

Maintainability in Mobile

Agenda

- What is a maintainable product
- Why is maintainability needed
- What you can start doing to make your app maintainable
- The cost of neglecting maintainability

What is a maintainable product

- Find a bug
- Fix that bug
- Add new features
- Add/change configurations
- Write unit tests
- Understand the code

Why is maintainability needed

What you can start doing to
make your app maintainable

DOCUMENTATION

S.O.L.I.D.

Principles

```
public class DemoActivity extends AppCompatActivity {  
  
    @Override  
    protected void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.activity_demo);  
  
        ImageView imageView = (ImageView) findViewById(R.id.imageView1);  
  
        Picasso.with(this)  
            .load(IMAGE_URL)  
            .placeholder(R.mipmap.ic_launcher)  
            .error(R.mipmap.ic_launcher)  
            .into(imageView);  
  
        imageView.setOnClickListener((view) → {  
            getSupportFragmentManager().beginTransaction()  
                .replace(R.id.main_container, new DemoFragment())  
                .addToBackStack(null)  
                .commit();  
        });  
    }  
}
```

```
public class DemoFragment extends Fragment {  
  
    @Override  
    public void onCreateView(View view, @Nullable Bundle savedInstanceState) {  
        super.onCreateView(view, savedInstanceState);  
        ImageView anotherImageView = (ImageView) view.findViewById(R.id.imageView2);  
  
        Picasso.with(getActivity())  
            .load(ANOTHER_IMAGE_URL)  
            .placeholder(R.mipmap.ic_launcher)  
            .error(R.mipmap.ic_launcher)  
            .into(anotherImageView);  
  
        anotherImageView.setOnClickListener((view) -> {  
            getActivity().getSupportFragmentManager().beginTransaction()  
                .replace(R.id.main_container, new AnotherDemoFragment())  
                .addToBackStack(null)  
                .commit();  
        });  
    }  
}
```

```
public class DemoActivity extends AppCompatActivity {
```

```
    @Override  
    protected void onCreate(Bundle savedInstanceState) {  
        super.onCreate(savedInstanceState);  
        setContentView(R.layout.activity_demo);  
  
        ImageView imageView = (ImageView) findViewById(R.id.imageView1);
```

```
        Picasso.with(this)  
            .load(IMAGE_URL)  
            .placeholder(R.mipmap.ic_launcher)  
            .error(R.mipmap.ic_launcher)  
            .into(imageView);
```

```
        imageView.setOnClickListener((view) -> {  
            getSupportFragmentManager().beginTransaction()  
                .replace(R.id.main_container, new DemoFragment())  
                .addToBackStack(null)  
                .commit();  
        });
```

```
public class DemoFragment extends Fragment {
```

```
    @Override
```

```
    public void onViewCreated(View view, @Nullable Bundle savedInstanceState) {  
        super.onViewCreated(view, savedInstanceState);  
        ImageView anotherImageView = (ImageView) view.findViewById(R.id.imageView2);
```

```
        Picasso.with(getActivity())  
            .load(ANOTHER_IMAGE_URL)  
            .placeholder(R.mipmap.ic_launcher)  
            .error(R.mipmap.ic_launcher)  
            .into(anotherImageView);
```

```
        anotherImageView.setOnClickListener((view) -> {  
            getActivity().getSupportFragmentManager().beginTransaction()  
                .replace(R.id.main_container, new AnotherDemoFragment())  
                .addToBackStack(null)  
                .commit();  
        });
```

```
public class ImageLoader {  
    private Picasso picasso;  
  
    public ImageLoader(Context context){  
        picasso = Picasso.with(context);  
    }  
  
    public void load(String url, ImageView imageview) {  
        picasso.load(url)  
            .placeholder(R.mipmap.ic_launcher)  
            .error(R.mipmap.ic_launcher)  
            .into(imageview);  
    }  
}
```

What you can start doing to
make your app
maintainable

```
git commit -m '[CW-101] Adding User profile view'
```

```
git commit -m 'Resolve code review comments'
```

```
git commit -m 'Resolve code review comments'
```

```
git commit -m 'Resolve code review comments'
```

```
git commit -m 'Resolve code review comments'
```

```
git rebase -i develop
```

REBASE!

What you can start doing to
make your app
maintainable
